

Salesforce Users

Capture 100% of business cards with the option to create marketing campaigns.

It's as simple as taking a photo!

Salesforce users can use Scan My Voice to create tasks in Salesforce with the scanning application. No need to install the package to Salesforce!

*Contact a Vision-e Representative to add Voice Translation Service.

Print this page for a Salesforce Administrator to install the business card scanning solution off the AppExchange.

- 1. Admin Only:** Go to the AppExchange, use keyword: Vision-e Scan, and click the green 'Get It Now' button on our listing.
- 2.** For best practice, choose to install for All Users. You can decide which users get a license later in Manage Licenses.
- 3.** Have authorized users install the mobile application before scanning a business card.
